

# TOKELO KGOMO

COMPUTER SCIENCE STUDENT | ASPIRING SOFTWARE ENGINEER & CYBERSECURITY ENTHUSIAST

**SOUTH AFRICA | 0711499133 | [tokelokgopotso@gmail.com](mailto:tokelokgopotso@gmail.com) | GITHUB: John12-Tuks | Linkeldn**

## Objective

---

To obtain a software engineering or cybersecurity-focused position where I can apply my programming skills, penetration testing knowledge, and analytical abilities. I am seeking an opportunity to grow into a highly skilled engineer while building real-world experience in development, security, and systems analysis.

## Experience

---

- Cybersecurity & Networking Labs

2023 – Present

- Performed exploitation exercises on VMs (WebGoat, Juice Shop, Metasploitable)
- Practiced XSS, SQLi, authentication flaws and recon techniques
- Built and configured multiple Kali Linux and Ubuntu VMs for hacking labs
- Used Burp Suite, Wireshark, Docker, GNS3, and VirtualBox for practical security testing
- Currently enrolled in HackTheBox's Web Penetration Tester role, completing hands-on labs and real exploit simulations

- Software Development Projects | Personal Projects

2023 – Present

- Built "CyberBot" — a C# WPF chatbot with NLP, sentiment analysis, reminders, quizzes, cybersecurity tips, and full backend logic (Chatlib)
- Developed a Peer-to-Peer Skill Exchange App using TypeScript frontend, Java/C# backend, and MySQL
- Created and managed a DNS server with recon monitoring, ad-blocking, and callback traps using Docker & CoreDNS
- Worked with databases using SQL, MySQL, and concepts from academic coursework

## Education

---

Computer Science (Degree — In Progress)

Institution: IIE MSA

2023 – Present

Key Coursework: Databases, Networking, System Analysis & Design, Cloud Development (AZURE), Programming (Java, C#)

## **Skills & abilities**

---

### Technical Skills:

- Programming: Java, C#
- Frameworks: ASP.NET, .NET Core, WPF
- Cybersecurity Tools: Kali Linux, Burp Suite, Metasploit, Wireshark, Owasp Zap
- Databases: MySQL, SQL, MongoDB, SSMS
- Virtualization: VMware, VirtualBox, Docker, Ubuntu Server administration
- Web Development: HTML, CSS, JavaScript
- Web Exploitation: XSS, SQL Injection, CSRF, IDOR, Auth Bypass (via HackTheBox training and Personal labs)
- Operating Systems: Linux (Ubuntu, Kali), Windows

### Soft Skills:

- Problem Solving
- Time Management
- Communication
- Leadership
- Continuous Learning
